

AFTER BAD MILK MEN.

Uncle Sam Will Put a Stop to the Adulteration of Milk and Its Products.

Process Butter, So-Called, Is Sold Without Let or Hindrance for the Genuine Article.

Filth, Fat, Refuse, Garbage, Rancid Oil, Maggots, Decayed Axle Grease Sold for Food.

It Is a Good Thing that the Government Intends to Stop These Frauds.

Have Our Aldermen Been Too Much Interested in This Form of Graft to Interfere?

Uncle Sam is after the crooked Chicago dairies. Bad milk, adulterated milk, crooked milk, has been dealt out to Chicagoans at high prices. Bad butter, rotten butter, renovated butter "made out of axle grease," its being sold all over Chicago.

But the new Federal law will work quick vengeance on the crooks. The following proclamation from the Secretary of Agriculture is to be followed by drastic measures to punish the guilty:

Whereas, the Congress of the United States by an act approved June 3, 1902, authorized the Secretary of Agriculture to establish standards of purity for food products; and

Whereas, he was empowered by this act to consult with the committee on food standards of the Association of Official Agricultural Chemists and other experts in determining these standards; and

Whereas, he has in accordance with the provisions of the act availed himself of the counsel and advice of these experts and of the trade interests touching the products for which standards have been determined and has reached certain conclusions based on the general principles of examination and conduct hereinafter mentioned:

Therefore, I, James Wilson, Secretary of Agriculture, do hereby proclaim and establish the following standards for purity of food products together with their precedent definitions as the official standards of these food products for the United States of America.

JAMES WILSON.

B. MILK AND ITS PRODUCTS.
1. Milk (whole milk) is the lacteal secretion obtained by the complete milking of one or more healthy cows, properly fed and kept, excluding that obtained within fifteen days before and five days after calving.

Standard milk is milk containing not less than twelve (12) per cent of total solids and not less than eight and one-half (8.5) per cent of solids not fat, nor less than three and one-quarter (3.25) per cent of milk fat.

2. Blended milk is milk modified in its composition so as to have a definite and stated percentage of one or more of its constituents.

3. Skim milk is milk from which a part or all of the cream has been removed.

4. Standard butter is butter containing not less than eighty-two and five-tenths (82.5) per cent of butter fat.

5. Renovated or process butter is the product obtained by melting butter and reworking, without the addition or use of chemicals or any substances except milk, cream, or salt.

How many Chicago dealers comply with the above standards?
